

Mail Order Enrollment Process

For injured workers to be enrolled in mail order services under the Comp+ mail order offering, the following two steps need to be followed:

1. The injured worker or member of the TRISTAR team should request enrollment in the mail order program. Enrollment only takes a few minutes to verify delivery address and provide any allergy information.
2. Once enrollment is complete, the injured worker, in coordination with the TRISTAR team member should request new prescriptions from their prescriber.

Please provide prescribers with the following information based on the Injured Workers' state of residency:
